## FIVEPRE-LITERACY PRACTICES

### THAT HELP YOUR CHILD GET READY TO READ:

Model a love of reading. Cuddle up together with a book at bedtime, or anytime. Keep books everywhere: in the car, stroller, and bathroom. Most kids who have been read 1,000 books by the time they start Kindergarten are ready to learn to read.

Sing every chance you get. Singing slows down language and helps children hear the smaller sounds in words. Songs expose children to words they don't hear in everyday language. This vocabulary boost helps them when they learn to read.

Play is the "work" of children. Pretend play builds vocabulary, stretches the imagination, and nurtures pre-reading skills. Symbolic play (This box is a car! A boat! A train!) is the same type of thinking that will allow them to understand that a picture or the written word represents a real thing.

Play with a variety of writing tools - color, draw, scribble, and write with crayons, chalk, or sticks. Writing activities help children understand that print has meaning. Developing fine motor skills prepares children for writing.

Even newborns benefit from lots of talking. Tell stories, talk about the books you read, use new words, and start conversations with children. Ask open-ended questions, allowing plenty of time to think and answer.
